**July 2003**

## ***THE ABOLITION OF ABORTION***

Cry For Life International announce the proclamation of the Abolition of Abortion.

### ***Abortion is a violation of human rights***

Every doctor will agree that an unborn child is a human being. Abortion, the killing of the unborn child is a discrimination against that child. Its life is snuffed out purely for convenience. Why should one child be chosen to be born and another killed? This practice goes against all sound environmental policies. If the life of an animal species is endangered the world rushes to protect it. Note how the organization Greenpeace becomes active to save the world's endangered species. This is noble - except why do they not oppose abortion, where tiny human beings are painfully, torturously and cruelly killed in the mother's womb? Is a seal worth more than a child?

For many it seems impossible that abortion will be abolished. Yet truth prevails and God is on our side. Remember the worldwide evil of slavery. It was abolished. There were godly men who tirelessly worked against this evil, Wilberforce in England, Adams in America. Without their efforts we would have had slavery far longer. There is hope! With the help of God, prayer and endurance we will live to see a miracle, the Abolition of Abortion.

***We proclaim the abolition of abortion! Abortion will be abolished! With prayer and endurance!***

# *Networking for the abolition of abortion*

Cry for life International (Schreeuw om Leven, Hilversum, Holland) is becoming more active as the network centre for the international pro-life movement. Dr. Bert P. Dorenbos, President of Cry for Life, Treasurer International Right to Life Federation (IRLF) of which the chairman is Dr. Jack C. Willke, MD. The international office of IRLF is located in Hilversum, Holland, sharing space with Cry of Life. A strategic important aspect is to network more together. The local, national, regional and global pro-life movement needs to be more united.

The global pro-life movement is the world's largest volunteer and professional movement. The IRLF is working toward more communication and unity. The Cairo UN Population Conference was a major breakthrough. It was decided to coordinate the lobbying efforts of all the world's pro-life groups. Today there is a well-organized lobbying group of several hundred pro-lifers from all over the world.
